## 終極岩 (Ultimate Wall)

1.野地飛鼠 (The Flying Squirrel in the Field) 7B+/7C (5.12C/D) ☆☆☆  
12 bolts, 2 anchors 17 meters FA : 劉以德 2002.03.27

沿天花板左側岩角上攀，必須使用 Cheat Sticker 先掛好第一個快扣。屬於耐力型路線，難關位於完攀前三米，單步難度較雪山飛狐低，但須在路線前半段預留體力。Start from the arete of the big roof. Cheat sticker is recommended. Endurance style route, and the crux is in the last three meters.

2.雪山飛鼠 (The Flying Fox in Snow Mountain) 7B+/7C (5.12C/D) ☆☆☆  
與『野地飛鼠』共用第一個 Bolt。難關位於路線中段部分，約 V3 ~V4 的抱石難度，後半段只要耐力足夠便能完攀。Use the same first bolt with "The Flying Squirrel in the Field." The crux is in the middle of the route around V3~V4. The later half is only the endurance problem.

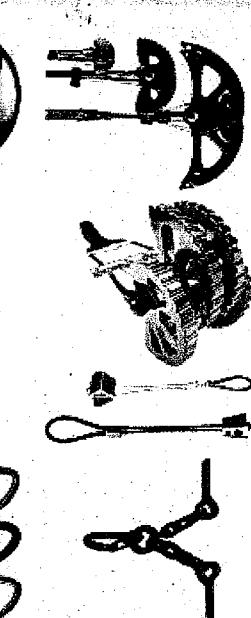

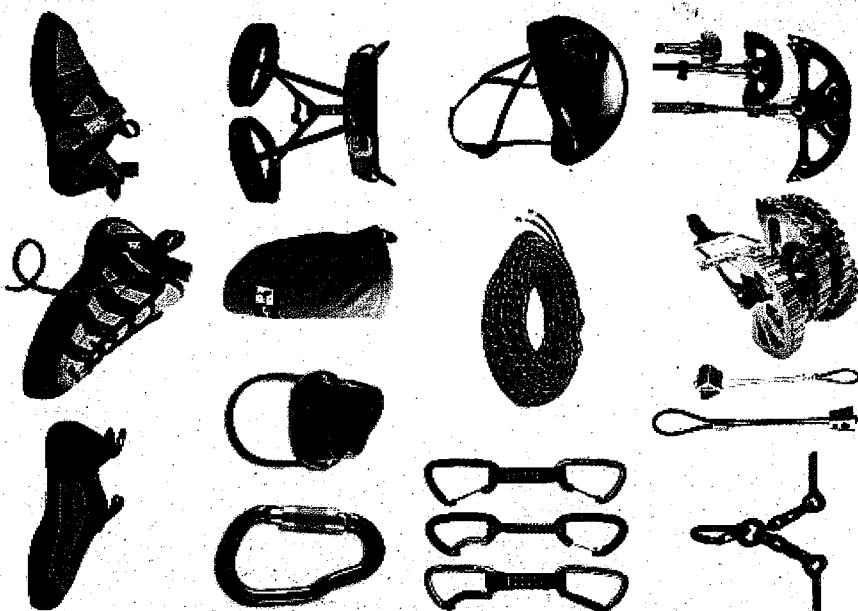

3.一棵榕樹下 (Under the Banyan) 6C+ (5.11B) ☆☆  
10 bolts, 2 anchors 14 meters FA : 陳智勇  
Top Anchor 的位置稍微高了一點，最好在最後裂隙直接站高掛快扣，這樣才是6C的難度。  
Top anchors are too high. Use the last crack and stand higher to clip the quickdraw.

4.天龍八步 (The Dragon Dances in the Air) 8A (5.13B) ☆☆☆  
14 bolts, 2 anchors 18 meters FA : 劉以德 2002.06.23  
『一棵榕樹下』接續上面 3 個 Bolts。結合耐力與爆發力之路線，『一棵榕樹下』之後有連續八個動作的難關，其中尤以第一難關彌倒扣一個彌勒最難，約 V6 之抱石難度。2003 年 4 月，此一倒扣點附近一個拇指扣的點斷裂，但並不影響整體難度。  
Continuing with "Under the Banyan," there are three more bolts and eight difficult moves in this section. The hardest move is an under-cling hold, and you should use it to reach another shallow finger pocket.

5.青蛙王子 (The Frog Prince) 7C (5.12D) ☆☆☆  
13 bolts, 2 anchors 17 meters FA : 劉以德 2002.03.30

從水泥產業道路上就可以看到這顆雄偉的巨石，此區也是整個攀岩區域的出入門戶。可惜右側天花板風化嚴重，目前還沒有路線被整理出來，而左側約 10°左右的外傾面，目前已經有七條路線被開發出來。

You can see the great boulder on the concrete trail, and Ultimate Wall is also the gateway of the whole climbing area. Unfortunately, the big roof on the right side is seriously weathered, and there is no route on it. The other side is a 10° overhanging face, and there are seven established routes on it.

## 終極岩 (Ultimate Wall)

1.野地飛鼠 (The Flying Squirrel in the Field) 7B+/7C (5.12C/D) ☆☆☆

4.天龍八步 (The Dragon Dances in the Air) 8A (5.13B) ☆☆☆

5.青蛙王子 (The Frog Prince) 7C (5.12D) ☆☆☆

13 bolts, 2 anchors 17 meters FA : 劉以德 2002.03.30  
倒數第二個快扣用長 Sling，倒數第三個快扣不使用。耐力型路線，整條路線最難部分位於倒數第 3~4 個 bolts 處，需以青蛙蹲坐之姿勢去抓一個遠處的 pinch 岩點，對於不同身高的人，有三種截然不同的破解法。

Power endurance route. You have to squat like a frog and reach a far pinch hold to overcome the crux. There are many different solutions for different height climbers.

從水泥產業道路上就可以看到這顆雄偉的巨石，此區也是整個攀岩區域的出入門戶。可惜右側天花板風化嚴重，目前還沒有路線被整理出來，而左側約 10°左右的外傾面，目前已經有七條路線被開發出來。

You can see the great boulder on the concrete trail, and Ultimate Wall is also the gateway of the whole climbing area. Unfortunately, the big roof on the right side is seriously weathered, and there is no route on it. The other side is a 10° overhanging face, and there are seven established routes on it.

### 6. 終極右 (Ultimate--Right)

6B (5.10C)      10 bolts, 2 anchors      18 meters      FA : 陳智勇

終極岩最簡單的熱身路線，要連翻兩次Over。

It's the simplest warm-up route in Ultimate Stone area. There are plenty of overhanging moves, and very interesting.

### 7. 終極左 (Ultimate--Left)

7A (5.11D)      6 bolts, 2 anchors      16 meters      FA : 謝遠龍

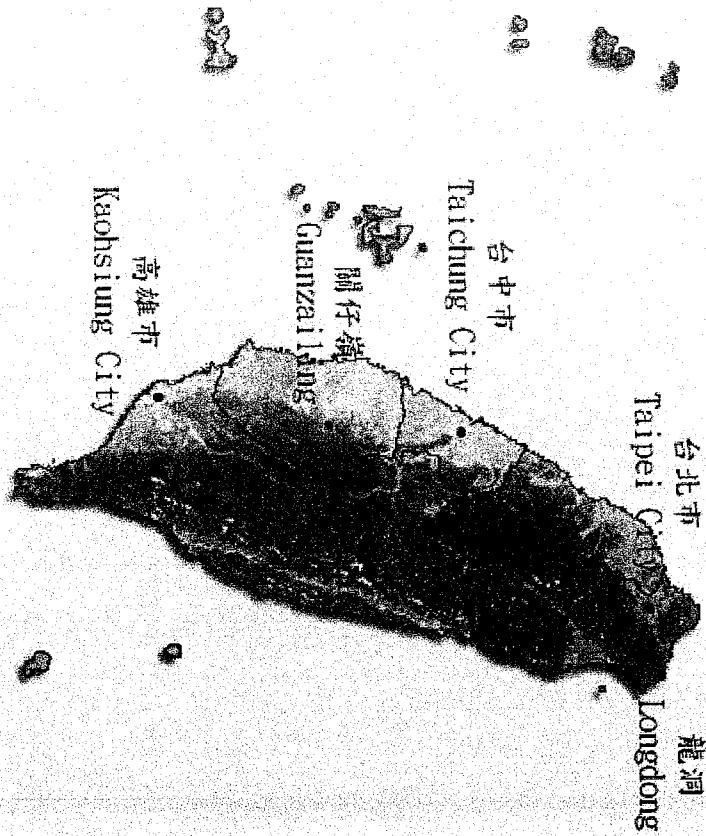

下面三個 Bolt 附近區域岩質非常糟糕，有落石危險，建議以 Top Rope 方式攀爬。

The rock quality is terrible before first three bolts. If you want to try this route, you can use "Ultimate--Right" to set up the top-roping system.

### 8. Project

這項新的project，難關在最後5米，大約10-12顆bolts，即是另一條獨立完整的20米長路線。

It's a new project in Ultimate Wall. The crux is in the last 5 meters section.

### 飛來石 (Flying Boulder)

從木欄杆一進來，一路上就可以看到飛來石的身影，相當好辨別，絕對不會錯過。目前僅開發出三條 Top-Rope 路線，高度只有六米左右。不過在照片中的右側岩角，也相當有機會開出一條很漂亮的運動攀登路線，另外還有右側的大 Over 面，同樣也有開發潛力，不過確保地點差，需另外架設 Belay Station。

You can see Flying Boulder while you get into the wood railing. There are three established top-roping routes on the façade. The right arete and the big overhanging face are still virgin lands and need to be developed.

#### 1. 天天見面 (Meeting Daily)      6A (5.10A)      2 anchors 6 meters

利用上方繩索架設上方確保系統。  
Use the upper wire to setup the top-roping system.

#### 2. 右手 (The Right Hand)      6C (5.11A)      2 anchors 6 meters

FA : YunYun  
與右手共用上方固定點。  
Share the same top anchors with "Right Hand."

#### 3. 左手 (The Left Hand)      6A+ (5.10B)      2 anchors 6 meters

## 集合場 (Assembling Field) -1

### 3.冰淇淋 (Ice cream)

4bolts, 2 anchors 9 meters

與右派共用第二個之後的 Bolt，可利用 Cheat Sticker 索繩。由左側起攀，起攀前幾點的距離有點遠。

Share the same bolts with "The Rightist." First three moves are a little far for short climbers. The cheat sticker is recommended.

### 4.破鏡重圓 (A Broken Mirror Joined Together) 7A+ (5.12A)

5bolts, 2 anchors 10 meters FA : Yum Yum

美人照鏡改良版，小點、不平衡腳點，12A 的入門路線。與美人照鏡共用上方兩個 Bolt 以及 Anchors。

It's a harder variation of "The Beauty with a Mirror." The crux is around the second bolt. Crimp holds and unbalance moves. It's an introduction to 5.12A. Share last two bolts and top anchors with "The Beauty with a Mirror."

### 5.美人照鏡 (The Beauty with a Mirror) 6C+ (5.11B)

5bolts, 2 anchors 10 meters

集合場最經典的路線，連續的倒拉動作很容易讓人 Pump。

It's the most classic route in "Assembling Field." Continuous under-cling moves will get you fully pumped!

### 6.蜘蛛網 (The Spider Web)

4bolts, 2 anchors 9 meters

難耐在第三、第四快扣之間，需要做出一個比較遠的動作，不過路線左邊現在多了一個由樹根清出來的手點，難度變簡單了一些。

The crux move is between 3<sup>rd</sup> and 4<sup>th</sup> bolts, and is a little far for short people. But since an extra hold cleaned from the tree root, the grade turns into a simpler one.

## 1.天天天藍 (The Blue Sky) 6B+ (5.10D)

☆☆☆

8 bolts, 2 anchors 12 meters

相當經典的石灰岩路線，不會很難，要注意找尋適當的手點。

Classic limestone route. It's not really hard, but be patient to find appropriate holds. TRY IT NOW!

## 2.右派 (The Rightist) 7A (5.11D)

☆☆

4 bolts, 2 anchors 9 meters

頂角、勾脚、側拉，大角度懸岩的挑戰。可惜路線有點短，路線上

隻有兩處簡單。

Pinch, toe hook, under-cling and great overhang. It's a power style route, but a little short.

集合場 (Assembling Field) -2

蓬萊島 (Taiwan Boulder) -1

1. 謝氏家族 (The Xie's Family) 5A (5.8)  
4 bolts, 2 anchors, 8 meters FA : 謝勝雄

2. 新手上路 (The New Driver) 5A (5.6)  
4 bolts, 2 anchors, 8 meters FA : 黃政龍

3. 再來一次 (Try Again) 6A+ (5.10B)  
5 bolts, 2 anchors, 8 meters FA : 黃政龍

☆☆  
難關在第三個快扣附近，需要好的技巧  
才能夠突破這個沒什麼好手點的困難  
動作。

“Try Again!” you need great balance skill to  
overcome the crux move around 3<sup>rd</sup> bolt.

4. 未命名 (Unnamed) 5A (5.6)

4 bolts, 2 anchors, 8 meters

集合場新打的簡單路線。  
It's a new simple route in the "Assembling  
Field."

蓬萊島名稱由來是因為其正面有一處與台灣島形狀頗為相似的大岩塊。從終極岩通往集合場的小徑，仔細看看右邊會有一條小路，轉進去 20 公尺就可以看到隱藏在樹林後面的蓬萊島，此區有很大的懸岩地形，也有一面看似垂直，但實際上是一個將近 15° 懸岩的 Face。大多數都是指力型態的路線。蓬萊島兩側懸岩直上也都是有開發潛力的路線，單步難度估計都在 V8 以上。  
“Taiwan Boulder” is named by a Taiwan shape rock in front of the boulder. You can get here from the trail to “Assembling Field.” Take a look on your right, and you will find the entrance to “Taiwan Boulder.” There are two faces can be climbed, one has a big overhang and another is a 15° tilt face. The boulder’s height is only about 9 meters, so the routes here are almost pure power style.

1. 岩角 (Arête) 7C (5.12D) ☆☆

4 bolts, 2 anchors 6 meters FA : 曾振甫  
短的岩石型態路線，難關在前三個快扣間，需要用技巧及力量加以突破。

Pure power style route. The crux is in the first three bolts.

2. 道長 (The Taoist Priest) 6B (5.10C)

4 bolts, 2 anchors 7 meters FA : 陳智勇  
要仔細找對好點的位置，不要被其他爛點騙了喔！

Because of the colorful rock, it will make you confused in finding proper holds.

3. 一氣呵成 (One-Shot) 6C (5.11A)

FA : 陳智勇

朝人的手點加上不平衛的動作，要『一氣呵成』才容易完攀。  
Sharp holds and unbalanced moves, you need to accomplish it at one go.

4. Minority Beta 7B (5.12B) ☆☆

3 bolts, 2 anchors 6 meters FA : 王宏祥 2003.03.29

短抱石路線，難關在第二、第三快扣間，左手捏住一個小點，站高後可以抓住下一個大點。

Pure power route. The crux move is between second and third bolts. Crimp a tiny hold with your left hand, stand high, and try to reach the next big hold.

5. 魔域 (The Fiend Region) V5 ☆☆ FA : 王宏祥 2003.04.26

蓬萊島 (Taiwan Boulder) -2

1. 周遊列國 (Travel Around the World) 7B (5.12B) ☆☆☆

5 bolts, 2 anchors 9 meters  
從蓬萊島右側起攀，倒拉、Drop Knee 後抓住裂隙，然後左手扶一個小點去抓不好抓的倒拉點，翻至右側完攀。身高超過 175 CM 的人會有相當的優勢。

Start from the right side of Taiwan shape island. Use technique of under-Cling, drop-knee and try to reach a far straight crack. Then use a crimp to hold a bad under-cling stalactite. Traverse to right side top anchors.

2. 環島旅行 (The Taiwan-Around Trip) 6B (5.10C) ☆☆

4 bolts, 2 anchors 8 meters FA : 陳智勇

蓬萊島正下面起攀，注意手點位置及順序，可以節省不少力氣。

The problem is in the "Taiwan Boulder" cave. Sit-down start from the right side. Traverse to the left, and the end hold is on another rock.

3. 投奔大陸 (Seek Shelter from China) 7A+ (5.12A) ☆☆☆

7 bolts, 2 anchors 10 meters FA : 陳智勇

前四個 Bolt 與環島旅行相同，之後沿 Ledge 往左橫渡，需要掛腳、勾腳等技巧。

First four bolts are the same with "The Taiwan-Around Trip." Then traverse along the ledge to the left arete. It needs lots of heel and toe hook skills.

4. 跳島戰術 (The Hopping Tactic) 7B (5.12B) ☆☆☆

6 bolts, 2 anchors 10 meters FA : 王宏祥 2003.04.05

港蓬萊島左側起攀，第一個 Bolt 與環島旅行相同，之後沿大 Overhead 上，換到投奔大陸第五個 Bolt。大角度懸岩、需要指力、爆發力的路線。

Start from the left side of Taiwan shape island, and share the first bolt with "The Taiwan-Around Trip." Then climb on the big overhanging face till the fifth bolt of "Seek Shelter from China." Continue to the top anchors of "Seek Shelter from China." It needs much finger strength.

在蓬萊島這一面大懸岩中，還有左側及右側沿懸岩直上的路線還沒有被開發出來，相信單步難度都在 V8 以上，值得有心挑戰自己的人來嘗試。

There are still two difficulty routes on this wall. You can try straight forward up to the top from two sides of Taiwan shape island. Each route will be harder than V8.

3.右耳 (The Right Ear)  
5 bolts, 2 anchors 10 meters

神秘谷中有個很明顯的大象耳朵形狀鐘乳石，沿耳朵右側上攀，相當有趣的路線，可以整個跨坐在鐘乳石上休息。  
A big elephant ear shape stalactite is the landmark of "Mysterious Valley." The route's name is "The Right Ear," so you can figure out how to climb it. If you feel tired, you can sit on the BIG EAR and enjoy the afternoon tea.

4.左耳 (The Left Ear) 6A+ (5.10B)

5 bolts, 2 anchors 10 meters  
顧名思義，當然就是耳朵左邊的路線囉。與右耳共用頂端固定點。  
Use the same top anchors with The Right Ear.

6.錦蛇 (One Rigid Finger) 6C+ (5.11B)

4 bolts, 2 anchors 12 meters

難關只有一步，要利用一根指頭的小洞平衡站起來。建議先掛好第一個快扣。

The crux is just one step. Use a one-finger pocket and try to stand up. Cheat sticker is recommended.

7.鼻孔 (The Nostril) 6B+ (5.10C)

5 bolts, 2 anchors 12 meters  
兩個手指插入鼻孔中，大象的鼻子不容易踩好。  
Two-finger pocket. Watch your step! It's a little slippery.

Start from the arete. Share the same top anchors with "One Rigid Finger."

8.鼻樑 (The Bridge of the Nose) 6C+ (5.11C)

5 bolts, 2 anchors 12 meters  
指力路線，難關在第二、第三快扣間。

The crux is between 2<sup>nd</sup> and 3<sup>rd</sup> bolts.

9.痛 (Pain) 6A+ (5.10B)

4 bolts, 2 anchors 12 meters  
顧名思義，豈一個「痛」守了得.....  
The route's name is PAIN.....

10.怕怕 (Fear) 7B+ (5.12C)

5 bolts, 2 anchors 12 meters  
FA : 陳智勇  
起攀會有一定的恐懼感，建議先掛好第一個快扣。  
The name is Fear. Cheat Sticker is recommended.

1.大拇指 (The Thumb) 5A (5.6) 4 bolts, 2 anchors 10 meters  
在神秘谷入口處右側沿裂隙起攀，簡單的新手路線。

The route is in the entrance of "Mysterious Valley." Start from the right side of crack. It's very suitable for beginners.

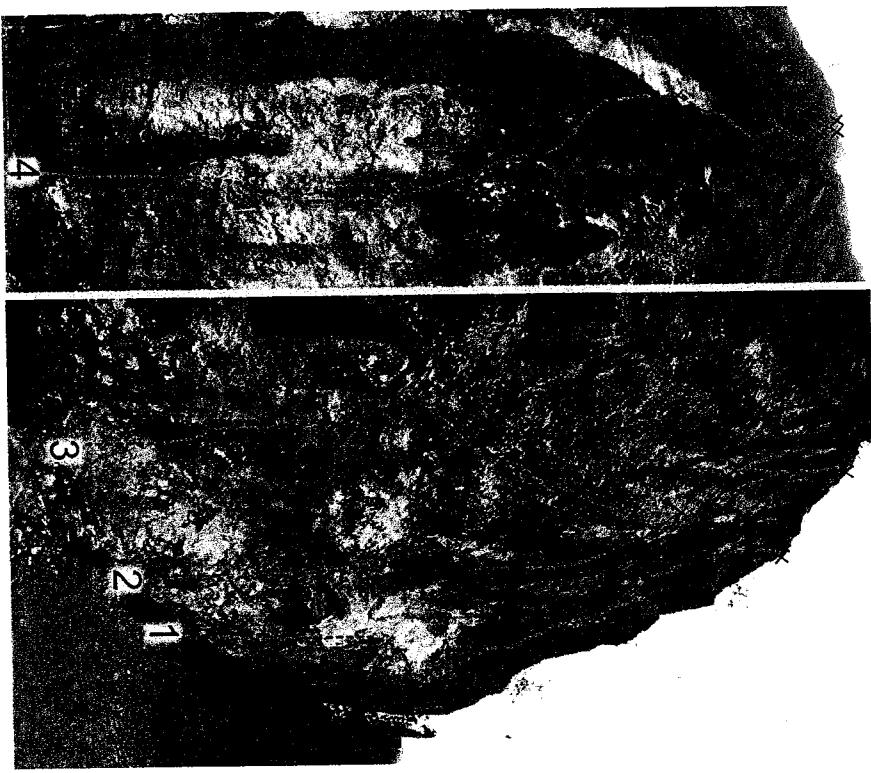

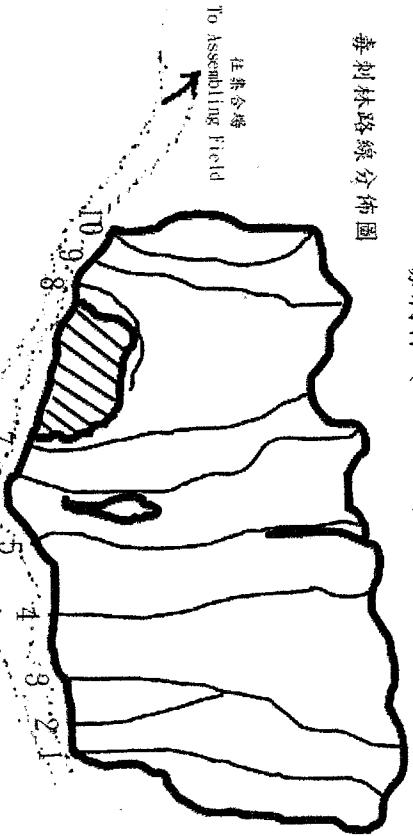

2.無名指 (The Ring Finger) 5A (5.6) 4 bolts, 2 anchors 10 meters  
這是一條相當簡單的新手路線。  
Start from the left side of the crack. Just for beginners.

To Assembling Field

毒刺林是關仔嶺岩場最後開發的區域，路線長度廣分佈在 10~13 公尺之間，大多屬於肌耐力型態路線。展望極佳，不受烈日影響，夏季亦可攀爬，岩壁也不易因久雨而潮濕。這個地方給我的感覺頗像 Krabi 的 Tha Wand Wall，同樣都有攝人的氣勢以及相當好的視野。

毒刺林距離集合場約需步行 10 分鐘，從集合場旁邊小徑往神秘谷方向前進，右轉一小岔路，穿過林間小徑，在石灰岩與樹林中行走，天雨時地面濕滑，需小心。全區共有八條已開發完成的路線，角度分佈在 10~20° 之間，最簡單的是入口處的黑無常、白無常兩條路線，其餘都是超過 7A+ 的困難路線，目前還有一條 Project，難度可能超過 8B+ (5.14A)。

由於此區照片是以合成方式處理，變形量有點大，可能與真實視野有點差距。

Doucilin is the latest opened area in Guanziling. The route heights are ranged from ten to thirteen meters. Most of them are power-endurance routes. The view here is so great, and the sunshine will be shielded, so you can enjoy climbing here in summer. The wall will not be damp even after several days rain.

Take the trail beside "Assembling Field" to "Mysterious Field." Notice a small forked trail on your right side. Go through the woods between many limestone boulders. It needs about ten minutes to get there. Once it rains, please watch out the slippery ground.

There are eight established routes here. The simplest routes are "The Black Ghost" and "The White Ghost" near the entrance. All of the others exceed 7+ (5.12A). And we still have one project there. And it will be rated harder than 8B+ (5.14A).

Drawings here are jointed by many different photos. There are some deformers on the edges. But you can use the sketch map to find the route you want to try.

#### 1. 白虎 (The White Tiger)

7A (5.11D)  
6 bolts, 2 anchors 9 meters

FA : 陳智勇

起攀需注意，岩質不佳，建議先掛好第一個快扣，難關在第 5、第 6 快扣間，需要做出平衡動作。屬於耐力型路線。

Be careful about loose rock around the first bolt. Cheat sticker is recommended. The crux move is between 5<sup>th</sup> and 6<sup>th</sup> bolts, and you need to use an open hold to do some balance motion.

#### 2. 雞肉飯 (Chicken Rice)

7C (5.12D)  
7 bolts, 2 anchors 11 meters

FA : 劉以德 2002.04.06

白虎左側路線，肌耐力型路線，動作富變化性，路線中段有個大點可供休息。路線上半段與 Yuji's Project 共用四個快扣，下降時不妨摸摸看 5.14 的點究竟有多小！

Power-endurance route, plenty style of actions, and there is one big resting hold in the middle. The upper section is the same with Yuji's Project, so you may want to feel how small the holds are of the 5.14 route while you lower down.

### 3. Project

8 bolts, 2 anchors 12 meters

Yuji's Project, 2003.04.06 Yuji 來台第一次試攀。認為難度至少有 8B+ (5.14A+)，可能是台灣第一條 5.14 路線。

整條路線沿著毒刺林中最特別的紅白相間岩壁直上，有很多小的 Edge 以及連續的 Open 摩擦點。When Yuji came to Taiwan at 2003.04.06, he worked out on this route at least ten tries. He thought that this project will be harder than 8B+. It might be the first 5.14 route in Taiwan. Climb along the special red/white mixed wall in Douciuin. Continue with small edges and open holds.

### 4.浴火鳳凰 (The Phoenix Out of Fire)

7C+ (5.13A) ☆☆☆

9 bolts, 2 anchors 12 meters

FA : 劉以德 2003.05.21  
路線難度平均，屬於耐耐力型的路線，共有兩個約 V5 及 V4 的抱石難關，分別在第 3~4 個 bolts 及倒數第 2 個 bolts 處。第一處難關須動態去 dyno 一個小 edge，第二難關則是須以右手搭住一個 open 點。兩步距離皆有型遠。此路線是相當經典的 5.13A 路線，難關平均分配，雖然單步只有 V5 之抱石難度，但整條路線幾乎無休息之處。

The route is uniform, extremely power-endurance route. It will be the representative of 7C+ grade. Each single move will not exceed V5, but you can't find one resting hold through all moves.

### 5. 小蜜蜂 (The Little Bee)

7B+ (5.12C) ☆☆☆

7 bolts, 2 anchors 11 meters

FA : 劉以德 2002.07.02  
從毒刺林正中間鐘乳石右側起攀直上，連續外傾懸岩。難關在起攀處以及第四、第五快扣間，兩個手點距離相當遠。命名原因是因為當初首攀時在路線上清除了三個蜂窩。現在幾乎每年春夏都會有新的蜂窩，要注意安全！

Start from the right side of the central stalactite in Douciuin. Straight forward, continue with overhang section. The crux moves is between 4<sup>th</sup> and 5<sup>th</sup> bolt. Pocket holds with long reach. It's named by a cleaned beeieve when they first ascended it. Unfortunately, the bees will return and build a new one every year. So be careful about your own safety, and please don't infuriate them.

### 6. 天堂之路 (The Pathway to Paradise)

7B+ (5.12C) ☆☆☆

7 bolts, 2 anchors 10 meters

從毒刺林正中間鐘乳石左側上攀，第四個 Bolt 之後偏左側爬。在路線右側上方有多打一個 Bolt，不需要用到。耐力型路線，整條路線難度平均，與小蜜蜂相當，皆為典型的石灰岩路線，動作富變化性。Start from the left side of the central stalactite in Douciuin. After the 4<sup>th</sup> bolt, leans to the left side. There is an unnecessary bolt on the right side. It's a classic limestone power-endurance route.

### 7. 方塊酥 (The Square Cookie)

7C/7C+ (5.12D/5.13A) ☆☆☆

6 bolts, 2 anchors 8 meters FA : 劉以德 2002.11.13  
天堂之路左側約兩米的路線，Yuji 認為比青蛙王子還要難一點喔。

第三個 Bolt 右側有廢棄耳片，有用紅色膠帶纏繞，切勿使用！！！爆發力型路線，難關集中在前四個 bolts，約 V5 之抱石難度，光鋒時需小心。與雞肉飯同為毒刺林兩條經典的 7C 路線，故以嘉南兩大名產命名之。

In Yuji's opinion, this route is harder than "The Frog Prince." Power style route. The crux moves concentrate on the first four bolts. Each move is about V5. There is a damaged bolt near the 3<sup>rd</sup> bolt wrapped with the red tape. "The Square Cookie" and "Chicken Rice" are both classic 7C routes in Douciuin, so they are named after two special foods from Jia-Yi.

### 8. One Hand Clip

7B (5.12B) ☆☆

5 bolts, 2 anchors 8 meters FA : 陳智勇

天花板 Lip 橫渡，手點上有一些雜草，看起來不太吸引人。Traverse on the lip of the big roof. There are some weeds on the wall.

### 9. 白無常 (The White Ghost)

6B (5.10C) ☆☆

6 bolts, 2 anchors 9 meters FA : 謝遠龍

毒刺林入口處，岩壁呈現明顯的黑白兩側，右邊白色為白無常，左側為黑色為黑無常，兩條路線的手點都相當刺人。爬到頂端下降時會磨繩子。

In the entrance of the Douciuin, the wall is separated by clear white and black parts. The right side is "The White Ghost," the left side is "The Black Ghost." Holds in these two routes are very sharp. The rope will be rubbed if you climb to the anchor and are lowered down by the belayer.

### 10. 黑無常 (The Black Ghost)

6B+ (5.10D) ☆☆

5 bolts, 2 anchors 8 meters FA : 彭貴祺

手點不錯，但要忍住刺痛感。Big holds, but you have to tolerate the painful irritation.

法式與美式的難度對照表有很多版本,本書列的對照表是其中一種(有些書是 5.11a=6b+)。

There are several different grade charts between "French Technical" to "U.S. YDS." Sometimes they point that 5.11a is almost the same to 6b+. It's only an assistant tool to help people climbing safely, so please don't persist too much in it.
